### DETAILED ACTION

1. This action is in response to applicant's amendment filed on July 23, 2007 in which claims 15-20 have been cancelled. Claims 1-14 are now pending.

### *Allowable Subject Matter*

2. Claims 1-14 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

The present invention is directed to a system and method for performing a handover between networks with different communication modes.

The instant invention with respect to claims 1 and 8 teaches a wireless communications system and a method for handing over a terminal from a first base station to a second base station, identifying the uniquely distinct features " e) notifying said first mobile switching center by said second mobile switching center **via said roaming gateway** that said terminal is ready to hand over to said second base station, upon recognizing that said second base station controller has completed the paging of said terminal; f) controlling said second mobile switching center by **said roaming gateway**, such that said second base station controller sets up a call with said terminal, as said terminal is ready to hand over to said second base station; and g) notifying said first mobile switching center by said second mobile switching center **via said roaming gateway** that the call setup with said terminal has been completed, upon recognizing

that said second base station controller has completed said call setup with said terminal."

The closest prior art, **Jain et al., U.S. Publication Number 2003/0114155 A1** teaches a method and system for a GSM mobile station roaming to an IS-41 system, wherein a roaming gateway interfaces between a CDMA mobile switching center (MSC) and a GSM core infrastructure to enable a mobile station subscribed in the GSM core infrastructure to communicate using the CDMA MSC (see p. 1 [0008] and Fig. 1; shows a roaming gateway 32 interfacing IS-41 MSC and GSM core 14 [i.e. includes a GSM MSC]). However, Jain fails to anticipate or render the above underlined limitations in combination with all the recited limitations of claims 1 and 8 obvious, over any the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
